WANTED TO COMPARE TRADES WITH VAN TASSELL

And Heard That He Was at Bantam in-the-Shepang-He Announces After

Hours All Is Screne-Lost Name of

Man Who Sold Him Nor. Securities. The voices of Wall Street ourb brokers. always strident, struck a more violent and angry chord yesterday morning in clamoring for Charles M. Van Tassell, a curb broker, with whom they wanted to make comparisons on trades in Northern Securities.

In 1894 Mr. Van Tassell became a member of the Consolidated Exchange and he remained such until several months ago, when his firm failed. Since that time he has been active on the curb, doing a conservative, careful business-the curb brokers are unanimous on this point-until the latter part of this week, when according to the same sources of information expressed with equal unanimity, he began o deal heavily in Northern Securities. The s'ock made new high' records four days during the week and before it reached the climax of 185% yesterday morning the

brokers began to want the comparisons. Mr. Van Tassell cleared through Cum-Mr. Van Tassell oleared through Cummings & Co. and representatives of the following firms called upon that firm with demands: Charles H. Gates & Co., Allen, McGraw & Co., Halle & Stieglitz, Batcheller & Rollins and Charles Head & Co. With some of the claimants the firm settled romptly; in regard to demands of others this statement was made:

The firm of Cummings & Co. is not responsible for Mr. Van Tassell. He requested us to take his clearances as a favor nd we accommodated him. Such of the and we accommodated him. Such of the transactions as we authorized we have already made good; whatever others there may be, if any, we refuse to vouch for."

Mr. Van Tassell's home is at Bantamon-the-Shepang, Conn. A telephone message to Bantam elicited the information that he was hurrying to New York. Apparently be got here after the noon hour, for this information was given out in the efternoon:

"Mr. C. M. Van Tassell, a curb trader, who it was reported yesterday, had 'laid down' on his contracts, denies that he did down' on his contracts, denies that he did so, but attributes the trouble to the loss of the name of a seller from whom he had purchased some Northern Securities stock, and states that the disputants in the mat-ter have been in conference and have ad-justed their differences. The only action which Cummings & Co. had in the matter was to clear the transactions of Mr. Van Tassell as reported by him."

DAILY TREASURY STATEMENT.

TAX EXEMPT GOLD BONDS To be sold Monday, April 24, 1905,

EDWARD M. GROUT, Comptroller City of New York, 280 Broadway, New York.

TAKE YOUR PROFITS IN

Go short of it at present prices. We openly advise selling this stock on talk of consolidation of Bingham Camp properties, as the mine itself, the value of which is in its Bingham Camp property, including a worthless smelter, DOES NOT APPROXIMATE A FRACTION OF \$15,000,000 (the value represented by present price of the stock). We do not know what effect present short-lived manipulation may do with this stock, but WE DO KNOW ENOUGH ABOUT EVERY FOOT OF GROUND IN BINGHAM CAMP, UTAH, to lead us to emphatically say that the five hundred thousand shares of the stock of this company AT THIRTY DOLLARS FER SHARE is ten times beyond its present value.

We strongly advise buying on any reaction Greene Copper, which is selling at the same price as United States Mining, one share of it being worth to-day FIVE SHARES OF UNITED STATES MINING COMPANY'S STOCK. In our judgment, Greene Copper will continue paring dividends for years to come. Colonel Greene is a thorough, capable and honest mining man, and in the same class with John W. Mackay, W. A. Clark, and Marcus Daiy. Greene Copper call in the same class with John W. Mackay, the chapter stocks.

In the Top Class of Nevada's Great Gold Properties

Unlike most of the gold mining companies that have later turned out to be producers or non-producers in Goldfield and its immediate vicinity, the Hearst-Jaggers group of mining claims can be said to be a developed network of mines before the company itself has spent a dollar on development work.

The locator of these claims, Tom Jaggers, from whom the property was purchased, is an old mining prospector of forty years experience. He has located other claims and developed them into mines before selling, and belongs to that old school of prospectors who have known no other means of disposing of a mining property than by developing it and, by the sinking of shafts, the carving out of tunnels and the blocking out of ledges, demonstrating to the purchaser the existence of ore-bodies sufficient to make a paying mine. The Hearst-Jaggers property stands out as one of the few that at its inception has guaranteed deposits of gold producing ore.

THE STORY OF THE HEARST-JAGGERS

The Hearst-Jaggers Gold Mining Company takes its name from the locator of the property, Tom Jaggers, and from the W. R. Hearst claim in the center of the group, so named by Mr. Jaggers when he located the same three years ago.

The property is situated 33 miles southwest of Goldfield in Tule Canyon. It consists of seven full mining claims or 140 acres. The claims are named as follows: W. R. Hearst, Polar Star, Valley View, Crescent, Last Loaf, Stray Horse and Leopold. Tom Jaggers, the discoverer, after an arduous career in the early mining days of Colorado, in which he profited to the extent of \$200,000 on mining claims he had located, went to New Mexico, and there he worked a little gold claim for several years, and also a pretty good silver property. He disposed of them and went to Arizona, from whence he traveled to California over the mountains, and then into Nevada. In 1895 he had been prospecting at Hawthorne, Nevada, when he struck a southern trail. A burro and the usual prospector's outfit was all he packed. He was looking for gold claims. After he had traversed over 100 miles, in which he spent seven months, and had prospected thoroughly every inch of the ground on the road, he located a silver property in Tule Canyon, now known as the Tom Jaggers Tule Canyon mine. This he gophered for ten years, and unaided by any living soul, took out \$30,000 of shipping ere. Between times he prospected in the district and located the Hearst group, now possessed by the Hearst-Jaggers Gold Mining Company. The Hearst-Jaggers Gold Mining Company takes its name from the locator of the property, Tom Jaggers, and from the W. R. Hearst claim in the center

The Mine of His Life

"In all my prospecting," says Mr. Jaggers, "I never saw anything more favorable in the way of mineral deposits than there are in Tule Canyon. Never in my life have I seen such favorable showings. Capital alone has been needed to make it a wonderful camp. The country is highly mineralized for miles on each side and in my opinion, development work will show greater ore deposits in that section than in the immediate vicinity of the town will show greater ore deposits in that section than in the immediate vicinity of the town will show greater ore deposits in that section than in the immediate vicinity of the town will show greater ore deposits in that section than in the immediate vicinity of the town will show greater ore deposits in that section than in the immediate vicinity of the town will show greater ore deposits in that section than in the immediate vicinity of the town will show greater ore deposits in that section than in the immediate vicinity of the town will show greater ore deposits in that section than in the immediate vicinity of the town will show greater ore deposits in that section than in the immediate vicinity of the town and the section than in the immediate vicinity of the town and the section than in the immediate vicinity of the town and the section than in the immediate vicinity of the town and the section than in the immediate vicinity of the town and the section than in the immediate vicinity of the town and the section than the section than in the immediate vicinity of the town and the section than the section that the

Immense Ore Bodies Will Keep a 20-Stamp Mill Busy for a Generation

A water well 90 feet deep is located 120 yards from the tunnel of the W.R. Hearst claim of the Hearst-Jaggers property. Wood is to be had at from \$5.00 to \$7.00 per cord. Charcoal can be had at 50 cents per sack from the Indians. A 20-stamp mill can be built and put in operation for \$20,000, and in the opinion of the company's mining engineers who have examined the property, sufficient ore can be taken out of the mine to keep this mill going for at least a generation. These are indications from the development work so far. However, in the opinion of the company's engineers, sinking of the main shaft 60 feet iarther will take it to the water level, and there it is expected even better results will be found. At that depth it is believed that the leads of the other claims owned by the company will form a junction with the W. R. Hearst, Polar Star and Valley View. It is a compact group, and the claims have been located with the utmost care, in order to prevent fractions being located by others to separate the workings.

If the sage opinions of these mining engineers are borne out and deposits increase with depth, it is no exaggeration to predict that the Hearst-Jaggers will turn out to be the greatest producer on either side of the Sierra Nevada Mountains.

At an expense of \$6000, this property can be developed up to a point where a mill can be considered, and the directors of the company have decided that the first \$6000 realized from the sale of stock shall be so employed. Work has already commenced and the shaft will be sunk 300 feet; in other words, 250 feet deeper than the present shaft. When that has been accomplished, a crosscut tunnel will be run from the bottom of the 300 foot shaft, in a westerly direction, to crosscut all the veins of this group except the Crescent. This prospecting will show up the true extent of the immense deposits. Drifts will be run on the lead, and then calculations will be made correctly as to the amount of ore tonnage and the size of the mill that will be necessary to reduce the

GENERAL FACTS ABOUT THE HEARST-JAGGERS

The Hearst-Jaggers group of claims owned by the company are located on low foot-hills. The altitude at this point is 3,200 feet. The property lies three-fourths of a mile from the border line that separates

Nevada from California. Bullfrog, the great new gold district already famous—which is 70 miles south of Goldfield—lies 38 miles southeast of the Hearst-Jaggers.

The Hearst-Jaggers is situated within a few miles of a direct line drawn north The Hearst-Jaggers is situated within a few miles of a direct line drawn north and south from Carson City, Nevada, to the Searchlight gold district in California, and may, therefore, be said to be centrally situated in the heart of Nevada's newly discovered mineral belt, in which are found Tonopah, where \$150,000,000 of gold ore is blooked out; Goldfield, which shipped \$4,000,000 in gold in the first year of its history, or a million dollars' worth more than Cripple Creek in the same period; and Bullfrog, which, within six months of its discovery, has found it profitable to cart to the nearest railroad station, 105 miles away, at a cost of \$90 per ton for drayage, tons of high-grade shipping ore.

grade shipping ore.
Within 90 days the railroad into Goldfield will have been completed, and then the
Hearst-Jaggers property will lie, relatively, as near to Goldfield, from a shipping

standpoint, as Goldfield has been to Tonopah during the first year of its existence, when it has found it profitable to ship \$4,000,000 wo th.

The attention of mining men in Goldfield has only recently been drawn to Tule
Canyon district and, outside of the Hearst-Jaggers and the Tom Jaggers, little has
been done in the way of developing any properties there, but there is a unit of opinion
among the best mining men that untold riches are contained in the Tule Canyon min-

ing district.

By consulting a map of Southwestern Nevada, it will be seen that Tule Canyon lies at one end of the Grape Vine mountain range, of which Bullfrog is the source. Discoveries at Bullfrog and Tule Canyon have started a stampede for both districts by an army of prospectors, and every inch of ground between Bullfrog and Tule Canyon is now under close inspection. The first news of other discoveries in this mountain range will create a furor equal to or greater than the original discoveries near the town of Goldfield, and will quadruple the market value of Hearst-Jiggers securities without necessity for the turning another spade.

Except for the local publicity caused by the great strike on the Hearst-Jaggers, no announcement of any kind has been made by the company, and this is the first official statement that is given out. It gives to investors the first definite and official story of the property.

Offering of Stock at 15c per Share

The directors have authorized the sale by the company's fiscal agent, Mims-Sutro Company, of 100,000 shares at 15 cents. These shares are of the par value of \$1. They are fully paid and non-assessable. The proceeds will be used for the development purposes. Half of these shares are already spoken for, and it is not believed that much time will elapse before the entire allotment will be fully subscribed. Unless all signs fail, this stock will be worth par within a year, and as soon as the first batch of treasury stock offered has been taken up by the public, the price will double. If it is found necessary to issue any more treasury stock for development purposes, the price will be advanced to at least double the present rate, and probably much higher. The company gives this guarantee: If at any time in the future it becomes necessary to raise funds for the further development of the property, the offer will not be made except at double the present figure.

A Directorate of Famous Mining Men

George Wingfield, president, is associated with United States Senator George S.

Nixon of Nevada in nearly all of Mr. Nixon's mining ventures in this country. Mr.

Nixon himself is one of the most extensive mining operators in Nevada. Mr. Wingfield has amassed over a million dollars in the past three years by getting in on the "ground floor" of half a dozen Tonopah and Goldfield mining enterprises that have made good. His acquaintance with mining men is of the widest range, and his success is due entirely to his ability to judge values.

W. J. Douglass, vice-president, is a far-famed mining engineer. He became one of the original owners of the now famous Montana-Tonopah mine when it was nothing more than a sandy stretch of desert, and gave no surface indications of ever becoming a great mine. Mr. Douglass's opinion that, on account of its geographical position, it would at a level of 500 feet show immense ore-bodies akin to the great Tonopah mine which owns the Mizpah ledge, has been vindicated, and stock in the company, which was originally sold for development purposes at 50 and 50 cents per share, is now quoted at \$3.00x Mr. Douglass, in addition to being a director in the Montana-Tonopah, is also an officer in half a dozen other great Tonopah and Goldfield mining companies, and is the superintendent of the only ore reduction mill in Tonopah, in which he is part owner. He was also one of the original owners of the Tonopah-Midway, which has also materialized into a great gold-producing mine.

Telegraphy and the superintendent of the original owners of the Tonopah-Midway, which has also materialized into a great gold-producing mine.

Development stock in the Tonopah-Midway was marketed at a shorter price than that of the Montana-Tonopah, and is to-day selling around \$1.25.

John S. Cook, treasurer, is the senior member of the firm of John S. Cook & Co., bankers, the leading banking house of Goldfield, which is incorporated with a paid-up capital of \$50,000. The company holds on general deposit upwards of \$50,000. Mr. Cook was for a long time cashier of the Nye & Ormsby County Bank of Carson City and Tonopah and has had a long experience in practical mining finance. His acceptance of the treasurership of the Hearst-Jaggers assures for the company an honest administration of its finances.

L. Bicakmore, secretary, is one of the rising young mining men of Goldfield. He has made his mark as a shrewd operator, and his perspicacity in mining transactions of all kinds has already marked him in Goldfield as an important figure. Mr. Bleakmore is in close touch with the best mining engineers in the district and enjoys every opportunity of investigating a proposition before casting his fortunes with it. His financial standing is excellent.

The officers of the Hearst-Jaggers are a body of practical mining men. They are right on the ground. They are in touch with all the mining interests of Goldfield and adjoining districts. A practical administration of the company's affairs is assured.

Telegraph your order for Hearst-Jaggers stock to Mims-Sutro Co., fiscal agents, Goldfield, Nevada, and let your remittance follow by same day's mail. The Mims-Sutro Company, Incorp., refers by permission to the Nye & Ormsby County Bank, Goldfield and Tonopah, Nev., and to John S. Cook & Co., bankers, Goldfield. Nev
